

Critical insight into methods and outcomes

Analyzing data in RE is a learned art rather than formulaic science and fixed queries.

Each analysis and analyst is different, as is each fertility center, its workflow, requirements and standards.

Equipped with the most sophisticated **On Line Analytical Processing (OLAP)** engine, eIVF offers customized, multidimensional analysis to administrative, clinical and practice data.

Gain Insights, Detect Patterns, Discover Outcomes...

- Demographics, Scheduling and Registration information
- History, Prior Evaluations and Outcomes
- Cycle and Protocols Data
- Drug Utilization
- Endocrine, Ultrasound, Andrology Tests
- Embryology
- Supplies
- Pregnancy Analysis
- Implantation Rates
